今後，廈門經濟特區將建設成為以工業為主兼營旅遊、商業、房地產業的綜合性、外向型的經濟特區，並逐步實行自由港的某些政策。在這一方針指導下，本公司將充分重視發展出口創匯的項目和重點發展技術密集和知識密集型企業，以及為促進和加快特區經濟發展的各種項目，把公司辦成一個多元化經營的集團式經濟實體，為廈門經濟特區的建設和發展作出新的貢獻。

The Construction & Development Corporation Of Xiamen Special Economic Zone

The Construction & Development Corporation Of Xiamen Special Economic Zone was incorporated in January, 1981 under the approval of Xiamen Municipal Government and the Administration Committee of Xiamen Special Economic Zone (SEZ for short). As a state-owned enterprise responsible for the work of import and investment under the leadership of the People's Government of Xiamen Municipality, the Corporation holds important tasks and plays an effective role in the development of SEZ.

The main functions of the Corporation are, pursuant to the laws, decrees and regulations of China and the regulations and overall plan of SEZ, to attract foreign funds (including the funds from overseas Chinese, Hongkong, Maccao and Taiwan), advanced technology, equipment and managerial knowledge, to incorporate joint ventures, cooperative enterprises with overseas companies and companies in Hongkong, Maccao and Taiwan and to assist investors in setting up wholly owned enterprises and in other investment-related matters.

The business range of the Corporation covers self- or jointly-owned enterprises in industry, agriculture, animal husbandry, communications and transportation, real estate, land exploitation, tourism, construction materials, commerce, foreign trade, service trades, scientific and cultural undertakings.

The Corporation is engaged in the absorption of funds, technology and equipment, raw and auxiliary materials for the purpose of technical renovation of Xiamen's existing enterprises, in processing and assembling with material, parts or models from the clients and in compensation trade.

The Corporation deals with import and export, transit trade and other types of trade, including import and export of the products, components, parts and materials for the Corporation's own purpose. The Corporation also deals with purchase and sales with the interior areas on behalf of the investors.

The Corporation undertakes such businesses as raising funds, trust investment, leasing, investment consultancy, etc.

The Corporation, since its establishment, has received and held discussions with thousands of government officials, representatives from economic and financial organizations, consortiums, enterprises and the press, experts and scholars, overseas Chinese and investors from different parts of the world, including Southeast Asia, Middle East, Europe, America, Africa, South Pacific and Hongkong, and Maccao and has had a wide business connection with many areas in China, through which the Corporation enjoys a good reputation both at home and abroad.

Since it's set up the Corporation has invested in tens of production and service projects by way of "introduction from abroad and association with the interior". Of all the joint ventures and cooperative management enterprises for which contracts have so far been signed with foreign investors in the SEZ, about half were introduced, negotiated or undertaken by the Corporation, and about one third were set up with the Corporation as a shareholder. Among them, the United Development Co. Ltd Of Xiamen Special Economic Zone, a company jointly managed by the Corporation with the Trust & Consultancy Corporation of the Bank Of China and Five Overseas Chinese banks from Hongkong & Maccao, has been playing a leading role in the construction and development of Huli Industrial District of the SEZ. Xiamen International Bank, the first joint venture bank using Chinese and foreign investment in China, which is jointly run by the Corporation with China Industrial & Commercial Bank, the Investment & Enterprises Corporation of Fujian Province and Hong Kong banking institutions, has also a great influence on the SEZ.

From now on, Xiamen SEZ will be built into one of a comprehensive and export-oriented nature, in which industry is taken as the main-stay whereas tourism, commerce and real estate should be developed at the same time. Furthermore, certain free port policies will also be gradually put into effect. Under the guidance of this strategy the Corporation will attach full importance to the export-oriented and foreign exchange earning projects and lay emphasis on developing tech-intensive and knowledge-intensive enterprises as well as various other projects which can help promote and speed up the economic development of the SEZ, so that the Corporation can be built into a bloc-like economic entity of diversified management, thus making new greater contributions to the construction of the SEZ.
