

HELPING STUDENTS

THROUGH COLLEGE

AT

PACIFIC UNIVERSITY

FOREST GROVE, ORE.

A FEW FACTS

50 to 100 students, prepared and anxious for a college education, are turned away each year from Pacific University, and many of them never succeed in entering college.

WHY? Because they have to earn their way, if they get an education, and the colleges cannot furnish enough work.

WHY? Because Oregon and Washington are still industrially undeveloped, especially in the outlying regions, where the best kind of people—honest and enterprising—are struggling to clear land.

THEREFORE: Many farmers and others cannot help their young people financially.

THEREFORE: If these young people of sterling quality are to have an education to fit themselves to lead their communities and build civilization, means must be provided for them to work their way. All they ask is a fair chance.

A CREED

I BELIEVE: That education is a power not only of training individuals, but also of building society.

I BELIEVE: That as the leaders among the young people go, so goes the community,—right or wrong, up or down.

I BELIEVE: It is the supreme business of the College to train young people to lead their communities right and not wrong.

I BELIEVE: That hundreds of communities, feeling the importance of this leadership, are appealing to the colleges to fit selected young men and women to help them, educationally, socially, economically and in their religious life.

I BELIEVE: That opening the way for these choice young people to earn their way through college is the best investment anyone can make.

AN OPPORTUNITY

NOTE! Pacific University, the old, "standard" pioneer college on the Coast, is now making definite plans to answer this call for help from these communities.

NOTE! By means of a Willow Furniture Factory, all details of which are approved by the best posted men thoroughly acquainted with the conditions.

NOTE! The plans are completed and funds are beginning to come in.

NOTE FURTHER! For the erection of the plant, costing \$3,000, ready to do business:—

\$100 will help*two or three students to earn their way as long as the building lasts.

\$1,000 will help 20 or 30.

\$3,000 needed will help 60 to 100.

\$10,000, to endow the enterprise with a loan, will be the best paying endowment any college has.
