Warm Springs Agency Oregon Sept 22 1890

Dear Sweet Love <sup>and</sup> Darling Mama

The shades of evening are gathering around. I have just  
eaten my supper as I was a little late. Pugged up my fishing  
pole about 5 o'clock and went above the dam at head of the  
race. I fished with fly hooks alone, no bait, and in a little  
over an hour caught 12 trout from 5 to 7 inches long. a  
nice little strong. I went down home Saturday <sup>pm</sup> intending to  
fish some but could find no pole so did not try. I looked over  
the letters &c in the drawer and cast away what I did  
not want to keep. I was looking for the affidavit Pa made before  
Daugherty about that note Holmes gave me the time we were taking  
the inventory of property. I found it & Holmes note too. I will likely  
have use for them especially of Pa gets Sallie Pitts affidavit.  
Coming home from the river (I was riding one of Sam's horses) I got  
me a nice fishing pole long and slim of buck. Saturday forenoon  
I made out the invoices of the Property Dr Daugherty was  
behind in his returns, most of which was the wagons teams  
& plows Pa & I gave our bond to make forthcoming, and

after dinner took them down to the office and Mr. Buckley came over and signed them so we are relieved and also Dr. Dr. of nearly all against him. Sam has yet to make out some affidavits for Brunell & others to swear to, so I think we'll get the Dr. out nearly if not entirely square. If we keep "pegging away" I think Pa will get out too. I saw in the Oregonian today that Rev. Turnbull had resigned. Warm Springs Johnny had struck artesian water in digging a well. Natural gas had been discovered near Lebanon. I have heard nothing of the "Something that was going to happen before long" in the O.P.R.R. extension. Guess as to tell now to expect anything this year. How is property in Albany? Did Pa allow Dr. S. anything for his improvements on that land he took back? Since I have been to Albany I like to know something more of what is going on as I feel more acquainted there now than I do at any other town in the Valley. Received your doubly welcome letter yesterday 2<sup>nd</sup> days from Albany. Saturday Mr. Buckley sent Perry about over to Wapiti to get Saturday night's mail as I wanted to get a letter he was expecting from The Dalles. & Perry got back before meeting was out. About 10 I commenced feeling awful blue & I could not shake it off, not even at meeting. I just felt-like I must fly. I hopped to go down to the office right after meeting & Sam told me there was a letter for me. Never did a letter of yours do me more good. It was as oil on the troubled waters. Thank you a thousand times. We commenced school session this afternoon. 12 Indian children & 3 white. Our first singing piece was the Capt. Jim's Temperance song. Mrs. Buckley

way of doing things, though, I have found you more or less to do the same thing  
I have seen a few ways of working known as 200 day work & more or less  
kind of work that takes a great deal of time & money to do the same  
work. I think we will do the same kind of work as you do in the mountains & pay  
less money than you do in the mountains for the same amount of work.  
Way of doing & doing the work as you do it is good & we may do it  
and probably do it better & faster than you do it. If you go to some place  
where you may do it in my way you & bring good & no other way &  
did all the teaching after I had helped her get things started.  
We will have only afternoon sessions this week. If I had a policeman  
here I'd have several more children in tomorrow. Antwine has not  
yet returned from the cattle side. I bought 2 gal Huckleberries this  
noon for \$1.50 and washed them & and this evening Mrs Jackson  
put them up for me 5 quart jars full. They wanted 1.00 a gal but  
I would not pay it. They claim they get .50 for a small pail full  
over at Penwell. There are quite a number out in the mountains  
but they are said to be drying their berries out there. I shant pay us  
such price for any more until about them next winter before I will  
do it. If you were here you could trade to better advantage though  
they don't offer many here for sale. Albert came in yesterday & said  
he was going out into the mountains today & told where we could  
find him. Mr Butler wanted me to go ad with him starting tomorrow  
but its now getting so late so near the time of year for a big rain  
storm that I don't like to chance it, and more than that, Dr Dorchester  
is liable to come in anytime, though I have heard nothing of him  
for sometime. Sam urged me to go, but I could see that Mr C  
would a little rather I should not go for fear Dr D would come.

besides your advice is safe to follow and I concluded to stay at home.  
Am glad, real glad that I got the extra letter out of you. That is if I  
get the usual one Wednesday. If it don't come I feel safer still any  
way. Saturday Mr Thompson came up with a form of a note written  
out and asked me if I could draw up a note. I told him I could  
draw a plain note of hand. This was a little more complicated.  
beginning to the effect - that "On or before October next Sam would pay  
him \$1360<sup>00</sup> for his right title & interest in the firm of Thompson &  
Coster. I drew up the note & Sam signed it so I presumed it a  
trade this time. The new boat goes along slowly. The timbers are  
about ready to put together. I have no word from S & W Portland as  
yet. We have about got Mr Buckley in the notion to make an  
Agency Commissary of the Wagon shop and move the latter  
into the old sawmill. and use the present commissary for  
School entirely and let us have the keys. and not let anything  
go out except for issues to Indians. He is willing to do it. only we fear  
when the temptation comes he will not be able to face it. He  
will have to or come out in "deep disaster". As near as we can  
make out the flour is short - near 700 lbs. Most of this is loaned  
out but - the difficulty is to get it in. Sugar is over 1000 lbs short.  
The property is well up on most items. but the subsistence is way  
behind in most things. We can bring him up if he will let  
us manage it. but we have doubts about it. We are giving him  
the plain figures and intend to tell him bad matters stand  
and then if he goes on as he has its his own fault. Good night sweet Pitts  
Truly yours Papa
