

**Pacific  
University  
in Oregon  
1977-78**

### **Statement of University Policy**

Pacific University is proud of its tradition of providing equal access to education to members of any racial or ethnic group. The official university policy is as follows:

Pacific University admits students of any race, color, sex, national and ethnic origin to all rights, privileges, programs and activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, sex, national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

As you begin to make your college choice, we feel that it is important that you consider the differences in the schools you are considering. With this in mind, we would like to highlight how Pacific University may be different.

Pacific University is a small independent school but attracts an unusually diverse student population. The student body represents 40 states and 9 foreign countries. Sixty-seven per cent of the Pacific students are from out-of-state. Sixteen per cent are minority students.

Located in a rural community of 12,000, yet only 25 miles from Portland, the University offers the advantages of a small town atmosphere and proximity to a major city.

The University, while committed to the liberal arts, continues to be concerned with the vocational goals of its graduates as manifested through an active career internship program.

Pacific is one of the few small, independent universities that offers two noted professional programs—Optometry and Physical Therapy.

Students will find a more intense learning experience in the unusual 7-7-3 calendar. The 7-7-3 calendar allows students to deal with fewer courses in highly concentrated periods of time.

The on-campus governance system provides for a committee system of government which involves students on all levels, including full voting membership on the Board of Trustees.

As you read further we hope you share some of the excitement that we feel about Pacific University.

# THE AREA

Pacific University is located in Forest Grove, a rural community in the foothills of the Oregon coastal range with a population of approximately 12,000. Portland, Oregon's largest metropolitan center, is located only 25 miles from campus.

Forest Grove provides students with a friendly, small-town atmosphere. The Community and the University often combine efforts on cultural and social events. The Forest Grove residents have been generous in their support of Pacific.

The Forest Grove area has four distinct seasons with warm summers, moderate falls, wet winters and brisk springs. Forty inches of rain fall annually and the area usually receives one or two light snowfalls.

Nearby Mt. Hood provides skiing and facilities for other winter sports. The beautiful Oregon Coast is only an hour away, and ample opportunities exist for camping and hiking close to campus.

# ACADEMIC PROGRAMS

The College of Arts and Sciences is the largest division within the University. It grants the degrees of Bachelor of Science and Bachelor of Arts.

In a time when study in the Liberal Arts is coming under criticism, Pacific University offers a Liberal Arts curriculum with a practical outlook to speak to the student's concern for future employment and career possibilities. Pacific seeks to educate students in order that they will gain a greater appreciation of the world around them, enrich their personal lives and enhance their ability to serve society. The Liberal Arts program can give students the tools for life-long learning.

Students may choose one of the 39 disciplinary and interdisciplinary majors within the College of Arts and Sciences. The following majors are offered:

**Applied Science**—for students interested in careers in engineering or in industrial applications of physics, chemistry and mathematics. The Applied Science major includes the 3-2 engineering program.

**Biology**—students develop a broad perspective of the relationship between biological sciences and the human organism. Individual research and internships are encouraged.

**Business and Economics**—provides a broad business background with concentration in marketing, finance, accounting, production and management or in economics. Career internships are encouraged.

**Chemistry**—designed to provide a general chemistry preparation with particular emphasis in the areas of organic, physical and analytical chemistry. Research is encouraged.

**Communications**—designed to provide the necessary skills to pursue careers either in the print media or electronic media. A career internship is recommended. Special facilities include a campus radio station and television studio.

**Coordinated Studies-Humanities**—designed for those who desire a broad education in liberal arts with a humanities emphasis.

**Coordinated Studies-Science**—designed for those who desire a broad liberal arts education with a science emphasis.

**Elementary Education**—leads to certification in the State of Oregon—Oregon certification is recognized in most states.

**English**—designed as a preparation to teach in the secondary schools, pursue graduate work or use language skills professionally.

# College of Arts and Sciences

**Environmental Science** — basic science preparation with particular emphasis on analytical techniques and the economic and political aspects of environmental problems.

**Fine Arts** — a general fine arts program with emphasis in Dance Arts, Studio Arts or Theatre Arts. Exhibitions, dance programs and dramatic productions are regularly presented.

**French** — provides the opportunity to learn the language and appreciate the culture of France. Professional courses for language teachers and courses in civilization and literature are offered. Study abroad is encouraged.

**German** — an opportunity to learn the language and appreciate the culture of Germany. Special arrangements are made to meet the individual needs of the student. Study abroad is encouraged.

**History** — develops a broad background for American or European history.

**Integrated Science** — provides a general course of study in the sciences as preparation for secondary teaching of science.

**Legal and Governmental Services** — an interdisciplinary major focusing on political science, sociology, economics and psychology with additional options in the humanities and the sciences. This prepares students for the study of law and/or careers in government service. Career internships are encouraged.

**Mathematics** — an applied and theoretical emphasis. The major prepares students to work in industry or business, or for graduate study or teaching.

**Medical Technology** — three years of undergraduate study at Pacific followed by 12 months at a school of medical technology. Admission to a professional school is highly competitive and not guaranteed.

**Music** — affords the student a broad musical preparation of a non-professional nature. See *School of Music* for professional music degree programs.

**Optics** — for students interested in research and development work in applied optics. Career internship is strongly encouraged.

**Philosophy** — acquaints students with the philosophical tradition of the Western world, and presents the chief philosophic problems and types of philosophy.

**Physical Education** — prepares students to teach Physical Education and/or coach in the public school system and leads to certification in the State of Oregon. Oregon certification is recognized by most states.

**Physical Education and Health** — prepares students to teach Physical Education and Health and/or coach and leads to certification in the State of Oregon.

**Physical Therapy** — Pacific University opened a new professional Physical Therapy program in fall 1975. It is the only professional program in physical therapy in Oregon.

The Physical Therapy program requires a minimum of three years of pre-professional study and 21 consecutive months of professional work.

Pre-physical therapy students are required to complete the following course work:

Biology	Community Health
Human Anatomy	General Psychology
Human Physiology	Abnormal Psychology
General Chemistry	Humanities
Organic Chemistry	Social Sciences
General Physics	

Admission to the professional physical therapy program is limited and very competitive. While there are advantages to completing the pre-physical therapy program at Pacific University, such completion does not guarantee subsequent admission to the professional program. *Information regarding admission to either pre-physical therapy or the professional physical therapy program can be secured through the Admissions Office.* Application to the professional program must be completed prior to January 15.

**Physics** — prepares students for careers in applied physics and for graduate study in physics and related fields. Facilities are available for research in optics, nuclear physics, spectroscopy and solid state physics. Internships are encouraged.

**Political Science** — prepares for careers in government service and for law school or graduate study. Internships are encouraged.

**Psychology** — offers course work in clinical, developmental and experimental psychology. Programs may be arranged for those who wish to enter career fields upon completion of the bachelor's degree.

**Recreation** — provides a general background for careers in the administration and planning of recreational programs. Internships and field experience courses are encouraged.

**Religion** — acquaints students with their religious heritage and concerns, with an emphasis on the Judeo-Christian faith.

**Social Studies** — a general social science preparation to become a secondary teacher of social studies.

**Social Work**—provides a general knowledge of human needs and resources and elementary skills in counseling relationships. This degree program is intended to provide skills for an entry level position in social services or to provide background for graduate study. Internships are encouraged.

**Sociology**—provides a basic knowledge of the development, structure and function of human groups and societies. Internships are encouraged.

**Spanish**—provides an opportunity to learn the language and appreciate the cultures of Spain and Spanish America. Professional courses for teachers and in civilizations and literature are provided. Study abroad is encouraged.

**Speech**—preparation for graduate study. It is possible to combine this major with speech education, speech pathology, communications or pre-law. Career internships are encouraged.

**Speech Pathology**—provides knowledge of the technical aspects of speech and hearing, both normal and disordered. Although most majors practice in public schools, some pursue graduate studies.

**Studio Arts**—introduces students to the visual arts. Course work includes painting, drawing, ceramics, sculpture, jewelry, photography, graphics, design, and art history. Career internships are encouraged.

**Theatre Arts**—Instruction in theatre and film includes most phases of theatre arts as well as the production and public presentation of selected plays.

**Therapeutic Recreation**—prepares students to deal with the recreational and leisure time needs of the disabled and geriatric populations. Therapeutic recreation specialists are employed by nursing homes, hospitals, mental health agencies,

city park and recreation programs, and correctional institutions.

Admission to the final two years of the four year program is dependent upon completion of the following:

Biology and Lab	Prof Act: Aquatics
Human Anatomy and Lab	Introduction to Psychology
First Aid	Analysis and Modification of Human Behavior
Motor Skill Learning and Development	Introduction Recreation/Therapeutic Recreation
Prof Act: Methods Dance and Rhythms	Field Experience

Admission to the pre-professional program does not guarantee subsequent admission to the professional program. Applicants to the final two years of the program will be evaluated on their academic record, quality of recommendations, field work, and an interview.

**Visual Science**—this program is completed only by those enrolled in the College of Optometry.

Pre-professional programs are available in **Optometry, Physical Therapy, Therapeutic Recreation, Medicine, Dentistry, Veterinary Medicine, Nursing, Pharmacy, Law and Engineering.**

The College of Arts and Sciences has developed eight disciplinary advisory groups. Each focuses upon a specific cluster of related careers and includes faculty members of related disciplines. These groups administer interdisciplinary majors, develop contract majors and supervise career internships. The career advisory groups are:

Applied Sciences and Mathematics	Education Health Services
Business Administration	Legal and Governmental Services
Communication Services	Social and Community Services
Coordinated Studies in Arts and Sciences	

#### **Graduate degree programs are:**

Master of Arts in Teaching in Foreign Languages, Language Arts, Art and Speech.

Master of Science in Teaching in Mathematics, Physical Education, Biology, Integrated Science and Social Studies.

Application forms and further information may be obtained from the Admissions Office.

# School of Music

A member of the National Association of Schools of Music, Pacific's Music School offers a well-balanced curriculum designed to meet the academic and performing needs of students.

Six degree programs are offered:

**Bachelor of Music in Music Education** — prepares the student to teach outside the State of Oregon.

**Bachelor of Music Education (Elementary)** — certifies students to teach in the State of Oregon on the elementary level.

**Bachelor of Music Education (Secondary)** — certifies students to teach in Oregon public schools on both the elementary and secondary levels.

**Bachelor of Arts with a Major in Music** — See College of Arts and Sciences.

**Bachelor of Music in Performance** — preparation for a professional career as a performer, with concentration on solo and ensemble work, and particular emphasis on applied music.

**Bachelor of Music in Music Theory** — preparation for entering graduate school and emphasizes analysis and research in theory and music history.

Membership in performing music ensembles is open to all students at the University. Ensembles include the University Band, University Singers, Pacific Community Orchestra, University Jazz Workshop, and various chamber music groups.

Musical productions are staged annually at Pacific, and an active community theatre group presents opportunities for singers and instrumentalists.

Special music events on campus include the Artist Series concerts featuring visiting professional performers; the Music in May festival for outstanding high school musicians; and various concerts and recitals by students and faculty.

The faculty of the School of Music represent wide backgrounds and interests, encompassing music experiences valuable to students in many areas of instruction.

A music library of records and scores, and a substantial collection of books in the University library, enable students to do research and analysis projects.

# College of Optometry

The Pacific University College of Optometry is one of 13 professional schools in the country granting the Doctor of Optometry degree. Excellent facilities and a dedicated faculty of national distinction result in a quality professional program.

The Doctor of Optometry degree requires a minimum of six years of college—a minimum of two years are spent in pre-professional studies, followed by four years in the professional program. Admission to the professional program is highly competitive. Applications to the professional optometry program must be completed prior to January 1.

Pre-optometry subject requirements are:

General Chemistry	Statistics
Organic Chemistry	Biological Science
English	Human Anatomy
Calculus	Humanities
General Physics	Social Sciences
General Psychology	

While there are advantages to completing the pre-optometry program at Pacific University, such completion does not guarantee subsequent admission to the professional program.

*Specific information regarding admission to either pre-optometry or the professional optometry program can be secured through the Admissions Office.*

**Graduate degree programs are:**

Master of Science in Physiological Optics.

Master of Science in Clinical Optometry.

Application forms and further information may be obtained from the Admissions Office.

# FACULTY

Pacific faculty members are selected for both their academic excellence and their desire and ability to work closely with students. The 12-to-1 student-faculty ratio allows for smaller classes and more individual attention.

Faculty members serve as academic advisors to the students. The advisor assists the student in planning the degree program, in selecting required and elective courses, and in post-graduate counseling.

A number of the faculty participate in a career internship program each summer. The objective of the program is to sharpen the faculty's perspective on the non-academic world. Faculty members have been able to incorporate their internship experience into their classes, bringing relevance and innovation to the present curriculum, and have been better able to assist their students in career planning.

Additionally, faculty-student exchange is encouraged both in and beyond the classroom. Personal relationships are regularly fostered by informal discussion in the University Center, evening visits in faculty homes, and occasional weekend trips.

# 7-7-3 CALENDAR

The 7-7-3 calendar (so designated to indicate the number of weeks in each term of study) was developed to provide a more personalized, intense and flexible learning experience. This is accomplished by allowing both students and faculty to concentrate on fewer courses at a time.

Fall Semester	Spring Semester
<b>7-7-3</b>	<b>7-7-3 (optional)</b>

The academic year is divided into two seven-week terms in the fall, a three-week term in the winter, and two seven-week terms in the spring followed by a spring three-week term. The spring three-week term is optional. Full-time students normally take 2 academic courses and 1 or 2 activity courses each seven-week term and 1 academic course each three-week term.

An example of a typical 7-7-3 freshman study plan is on the following page. Please note that it is only an example and in no way should be considered a plan required of all students. (There are no specific required courses in the freshman year.)

## 7 weeks (September 1-October 21)

Expository Writing (3 sem. units)	MTWTHF	10:40-11:50
Intro French Language & Culture (3 sem. units)	MTWTHF	12:50- 2:45
Language Lab (1 sem. unit)		To be arranged

## 7 weeks (October 26-December 16)

Western Civilization (3 sem. units)	MWF	8:30-10:25
Beginning Painting (3 sem. units)	MWF	10:40-12:35
Forensics (1 sem. unit)		To be arranged
P. U. Chamber Singers (1 sem. unit)	M	3:00- 4:10

## 3 weeks (January 4-January 25)

London Theater Tour (3 sem. units)		To be arranged
------------------------------------	--	----------------

## 7 weeks (January 30-March 17)

General Chemistry I (3 sem. units)	MTWTHF	8:00- 9:10
Introduction to Psychology (3 sem. units)	MTWTH	10:40-12:10
General Chemistry Lab (1 sem. unit)	TTH	9:20-10:30
Skiing (1 sem. unit)	Sunday	

## 7 weeks (March 27-May 16)

Logic (3 sem. units)	MTWTHF	9:20-10:30
Introductory Economics (3 sem. units)	MTWTHF	10:40-11:50
Applied Music—Piano (1 sem. unit)		To be arranged
Intercollegiate Tennis (1 sem. unit)		To be arranged

## 3 weeks (May-June) OPTIONAL

Astronomy (3 sem. units)	MTWTHF	8:30-10:00
--------------------------	--------	------------

# CAREER DEVELOPMENT

The faculty advisors and the career advisory groups assist students in the establishment and pursuit of appropriate career directions. While some students have well-defined career goals, many view college as an opportunity to explore possible career alternatives.

In the junior and senior years, students are encouraged to test the reality of their career goals by participation in the Career Internship Program. An optional component of the academic program, the Internship places students in off-campus work environments which pertain to their career goals. The student can observe and participate with professionals in their day-to-day work, from seven to thirty weeks, depending on the nature of the placement. Through this experience students can learn the particular job-content of an occupation and can project themselves into that role with a measure of reality. Other benefits include professional recommendations, a head start on other job seekers, and (in some instances) pay.

In addition to the Internship Program, post-graduate employment services are available to students and alumni throughout the school year. These placement activities include the establishment of personal placement files for use in job-seeking and on-campus recruiter interviews.

# STUDENT LIFE

Many factors contribute to the atmosphere at Pacific. Among these are the scholarly activities and dedication of the faculty; the challenge of the curriculum; the diversity of the students; the excellence of the library; the friendliness and informality of the University community; the location of the University; and the extracurricular activities—social, cultural and recreational. Intellectual and personal growth occur outside of the classroom as well as in the strictly academic setting.

## Activities

Pacific's size and open atmosphere allow the "personality" of each entering class to have a profound effect on what kinds of activities will occur during the school year. Students who wish to get involved in many different activities have an opportunity to thrive at Pacific. Strong programs are offered in forensics, drama, dance, music and radio production for those who wish to participate. Many facilities on campus are available for leisure time activities. For example, the art building and faculty are available to both art majors and any students with an interest in art.

Student organizations include residence hall organizations, local fraternities and sororities, music ensembles and choirs, student publications (such as the yearbook, newspaper, and literary magazine), and special interest groups including Chess Club, Concerned Black Students, Speech Fraternity, Hawaiian Club, International Student Club, Optometry Fraternity, Oregon Student Public Interest Research Group (OSPIRG), Science Club, P. E. Majors Club, Psychology Majors Club, Rally Squad, Student Optometric Association, Student Oregon Education Association, and Women's Recreation Association.

An Activities Director is employed by the University who, with the help of the Cultural Committee, plans films, dances, concerts, special festivals, and trips. Student input is welcome in the planning of activities.

Annual campus celebrations include Homecoming, Black Culture Week, Christmas Wassal Party, Hawaiian Luau, and Parents' Weekend.

Many recreational opportunities including skiing, sledding, camping, backpacking, hiking, bicycling, canoeing, fishing, hunting, and beachcombing are available as a result of Pacific's location. The University owns a 125-acre arboretum located 12 miles from the campus which is frequently used by students for recreational activities. Hagg Lake, 15 minutes from campus, provides opportunities for boating, water-skiing, fishing and picnicking.

The proximity to Portland offers the shopping, entertainment, restaurants, sporting events and parks of any large city. Bus service through the Portland Tri-Met system is available on a frequent and inexpensive basis.

### **Athletics**

Pacific offers eleven intercollegiate sports for men and eight for women. Men's sports are football, baseball, basketball, track, cross country, soccer,

tennis, golf, wrestling, bowling, and swimming. Women's sports are gymnastics, basketball, track, swimming, softball, bowling, tennis, and volleyball. Women's soccer and men and women's fencing have been developed as club sports.

While competition is keen and Pacific wins its share of championships, the emphasis is on enjoyment and participation. Additionally, a comprehensive intramural program is offered which has included everything from cribbage, chess and checkers to volleyball, flag football and softball.

### **Participatory Governance**

At Pacific, students, faculty, administrators, alumni, trustees and staff employees are brought into partnership in all matters of campus concern— personnel policies, management, discipline, curriculum design, and budgeting. Students are involved at all levels of decision-making, including full voting membership on the Board of Trustees.

### **Campus Housing**

The development of friendship and understanding among a racially, socio-economically and geographically diverse group of students and the development of the student's potential as a member of the social group are among the priorities of the residence program at Pacific. All freshman and sophomore men and women under the age of 21 live on campus in University residence halls. Junior and senior students, married students or those living with their parents may live off-campus.

There are three residence halls: Walter Hall, which is restricted to women on the first two floors, while the third floor is reserved for men; Clarke Hall, which is co-educational; and McCormick Hall, which is for men only.

The residence halls are divided into smaller living units. In some of the units traditional University policies govern the social life. In other areas, students establish their own social policies, within state law, based on the privilege of each student to study. Students themselves decide where they want to live, and under which of the options.

Each year, Pacific University seeks new students representing a wide variety of geographic, ethnic, and socio-economic backgrounds. In selecting students, the primary considerations are the student's academic preparation and potential for successful study at the college level, and the student's potential for making a contribution to Pacific University outside of the classroom.

### **Freshman Application Procedure**

High school seniors interested in applying should complete the following application steps:

1. Forward completed application form, \$15 application fee and activity card to the Admissions Office.
2. Submit recommendation form to high school counselor for completion.
3. Request an official high school transcript to be sent directly to the Admissions Office.
4. Arrange an interview with a member of the Admissions staff (optional).
5. Submit PSAT or SAT scores (optional). Male freshman applicants who plan to participate in intercollegiate athletics should be aware that the SAT is used in certain cases to determine athletic eligibility.

Forward all forms and correspondence to the Admissions Office, Pacific University, Forest Grove, Oregon 97116. Telephone (503) 357-6151.

### **Transfer Students Only**

Transfer students interested in applying should complete the following application steps:

1. Forward completed application form, \$15 application fee and activity card to the Admissions Office.
2. Submit recommendation form to faculty advisor for completion.
3. Request official transcripts of all college work completed to date to be sent directly to the Admissions Office. Transfer applicants who have completed the equivalent of one year or more of college-level work need not submit a secondary school transcript.
4. Arrange an interview with a member of the Admissions staff (optional).

Forward all forms and correspondence to the Admissions Office, Pacific University, Forest Grove, Oregon 97116. Telephone (503) 357-6151.

Pacific University selects from among applicants from community colleges, junior colleges, and other colleges and universities who have a cumulative G.P.A. of 2.00 or better for all college-level work undertaken.

Transfer students will receive full credit for college-level arts and sciences courses completed with a grade of C or higher.

To convert credits earned at an institution on a quarter or term calendar to semester credits, use the following formula:

$$\frac{\text{quarter (term) credits}}{1.5} = \text{semester credits}$$

### **Professional Optometry and Physical Therapy Applicants**

Applicants to these professional programs should contact the Office of Admissions for application procedures.

### **International Students**

International students are encouraged to apply to Pacific University. However, each international student must complete a Preliminary Application and Statement of Financial Resources form before receiving application materials. The Preliminary Application requires information on academic background, English proficiency, financial ability and other pertinent areas. If, after reviewing the completed Preliminary Application, the Admissions Committee considers it appropriate to encourage the student, the student will be sent additional application materials and instructions.

### **Rolling Admissions**

Pacific University considers applications as they are completed, beginning November 1 of each year and continuing throughout the school year. Therefore, interested students are encouraged to apply early in order to receive full consideration.

### **Presidential Honors at Entrance**

Pacific University wishes to recognize applicants who have achieved academic excellence. Therefore, those freshman and transfer applicants with exceptional academic records may receive the distinction of Presidential Honors at Entrance. This award becomes part of the student's permanent record at Pacific University and includes an award of \$100. Students need not apply for this recognition.

# COLLEGE BUDGETING

Pacific University maintains high educational standards at the lowest possible cost. An extensive financial aid program assists qualified students in meeting University costs.

## Costs

The cost of tuition and fees for the 1977-78 academic year is \$3,105. Room and Board is \$1,368 (double room and 19-meal plan). Additional charges are applicable to professional optometry students and to those taking applied music lessons.

## Financial Aid

The University attempts to meet the financial need of admitted students through a combination of scholarships, loans, and work opportunities. The only document needed to apply for financial aid is the College Scholarship Service Financial Aid Form (FAF). Aid is awarded based on financial need, as determined by a standard analysis of the FAF by the College Scholarship Service.

Freshman applicants with a 2.75 (on a four-point scale) academic grade point average, and a strong supporting recommendation, will have their financial need met (as shown on the FAF) if their applications and FAFs have been received by March 1. This same policy applies to transfer applicants with a 2.5 cumulative college grade point average and a strong supporting recommendation. Students who do not fall in the above categories will be considered for aid as funds are available.

All applicants for financial aid are expected to apply for the Federal Basic Educational Opportunity Grant (BEOG) program. Oregon high school applicants are also urged to apply for assistance through the Oregon State Scholarship Commission. School counselors have further information on these programs.

Some financial aids do not apply to applicants to the professional program in Optometry. For further information on aid that is available, write to the Pacific University Financial Aid Office.

## Payment Plans

Three options are currently available for payment of tuition, fees, and other costs:

1. Payment in full by mid-August with a 3% cash discount.
2. A 9-month payment plan beginning in mid-August.
3. A semester payment plan requiring 55% of the year's costs to be paid by mid-August and the remaining 45% by mid-January.

# FACTS

**Location:** Forest Grove, Oregon; population 12,000.

**Campus Size:** 55 acres plus 125-acre arboretum 12 miles from the main campus.

**History:** Founded in 1849 by Congregational missionaries.

**1976-77 Enrollment:** 1086 students; 744 men; 342 women.

**Out-of-state Enrollment:** 67 per cent.

**Faculty:** 70 full-time; 21 part-time.

**Faculty-student Ratio:** 1 to 12.

**Class Size:** Range is 10-80 students; average 15-20.

**Academic Program:** College of Arts and Sciences; School of Music; College of Optometry; Graduate Studies Program. Professional programs in Optometry and Physical Therapy.

**Accreditation:** Northwest Association of Secondary and Higher Schools; Oregon State Board of Education for the training of elementary and secondary teachers; American Association of Colleges for Teacher Education; Council on Optometric Education of the American Optometry Association; National Association of Schools of Music; American Physical Therapy Association Committee on Accreditation in Education.

**Library:** 113,661 bound volumes; 126,901 U.S. Government documents; 11,108 Oregon documents; 827 current periodicals and newspapers; 2,607 microforms; 2,022 microfilm reels; Walt Whitman Collection; Pacificana Collection.

**Calendar:** 7-7-3 Block Plan (Modified semester).

**Trusts and Endowment:** \$2.3 million.

**Housing:** 3 Residence Halls; 2 co-educational and 1 all male.

## Costs:

Tuition and Fees—Arts and Science/Music . \$3105  
Room and Board . . . . . 1368

**Financial Aid:** Total of \$1.5 million awarded to approximately 55% of student body.
